

Svante

The Climate Change Programme

Measurement and reporting - the basis for efficient climate work

- What part of your company emits most greenhouse gases?
- How can you restrict these emissions?
- How does your company compare with other companies?

The starting point for effective climate change initiatives is to perform a systematic climate audit – measure and report your company’s emissions.

”What get’s measured, get’s done”

Svante* - The Climate Change Program

Svante is an internet based program that supports companies in reducing their climate impact.

The program ensures transparency and comparability. Svante is based on international standard GHG-protocol

User-friendly. It saves time and reduces the risk of error.

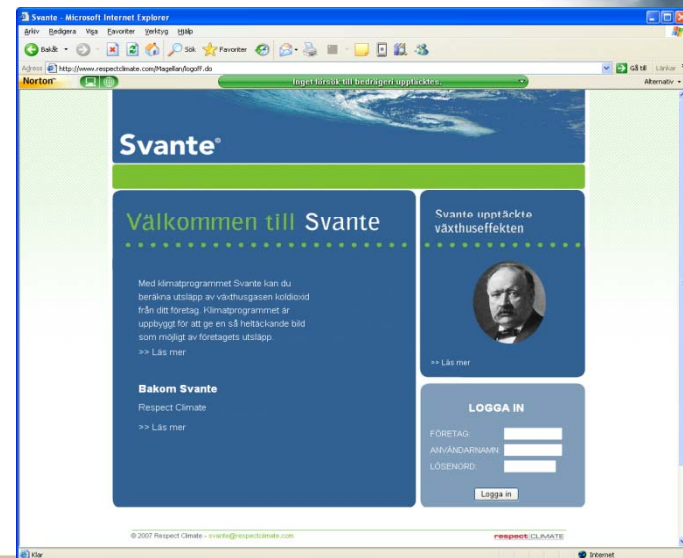

Svante is available in several versions to meet the needs of companies of all sizes.

*Svante Arrhenius is a Nobel Prize winner. Arrhenius investigated the greenhouse gas effect already in 1896.

Svante is a web based user friendly service

The Program provides:

- An overview and structure for climate change initiatives.
- Calculation support. Svante helps you convert your company's energy usage into climate impact.
- Comparisons between units, companies and over time.
- Simulation tool – test what effect different measures would have and optimize implementation.
- Key figures and benchmarking.
- Reports and presentations, text and graphs.

Svante is the fruit of many years cooperation with companies within the BLICC, (Business Leaders Initiative on Climate Change) network:

"For the first time Stena makes the GHG measurement by Svante. Stena aims at inspiring and supporting our customers to achieve efficient climate work and we will offer the climate program Svante to our customers".

Stena Metall, a major actor in recycling

respect | CLIMATE

“ What we like about Svante is that it has really been designed to be user-friendly: easy to fill data in, easy to get reports and diagrams that make conclusions faster to make! Working with environmental impact assessment feels as natural as it should be thanks to this tool”.

Karine Hirn, East Capital
CEO and Founding Partner

Jacob Albin Karine Peter Kęstutis Justas Aivaras

"Thanks to the program you get a fast and easy-to-grasp picture of your emissions. That is a great advantage".

Bertil Rosquist, McDonalds Sweden, Head of Environment in Dagens Industri, October 30, 2007

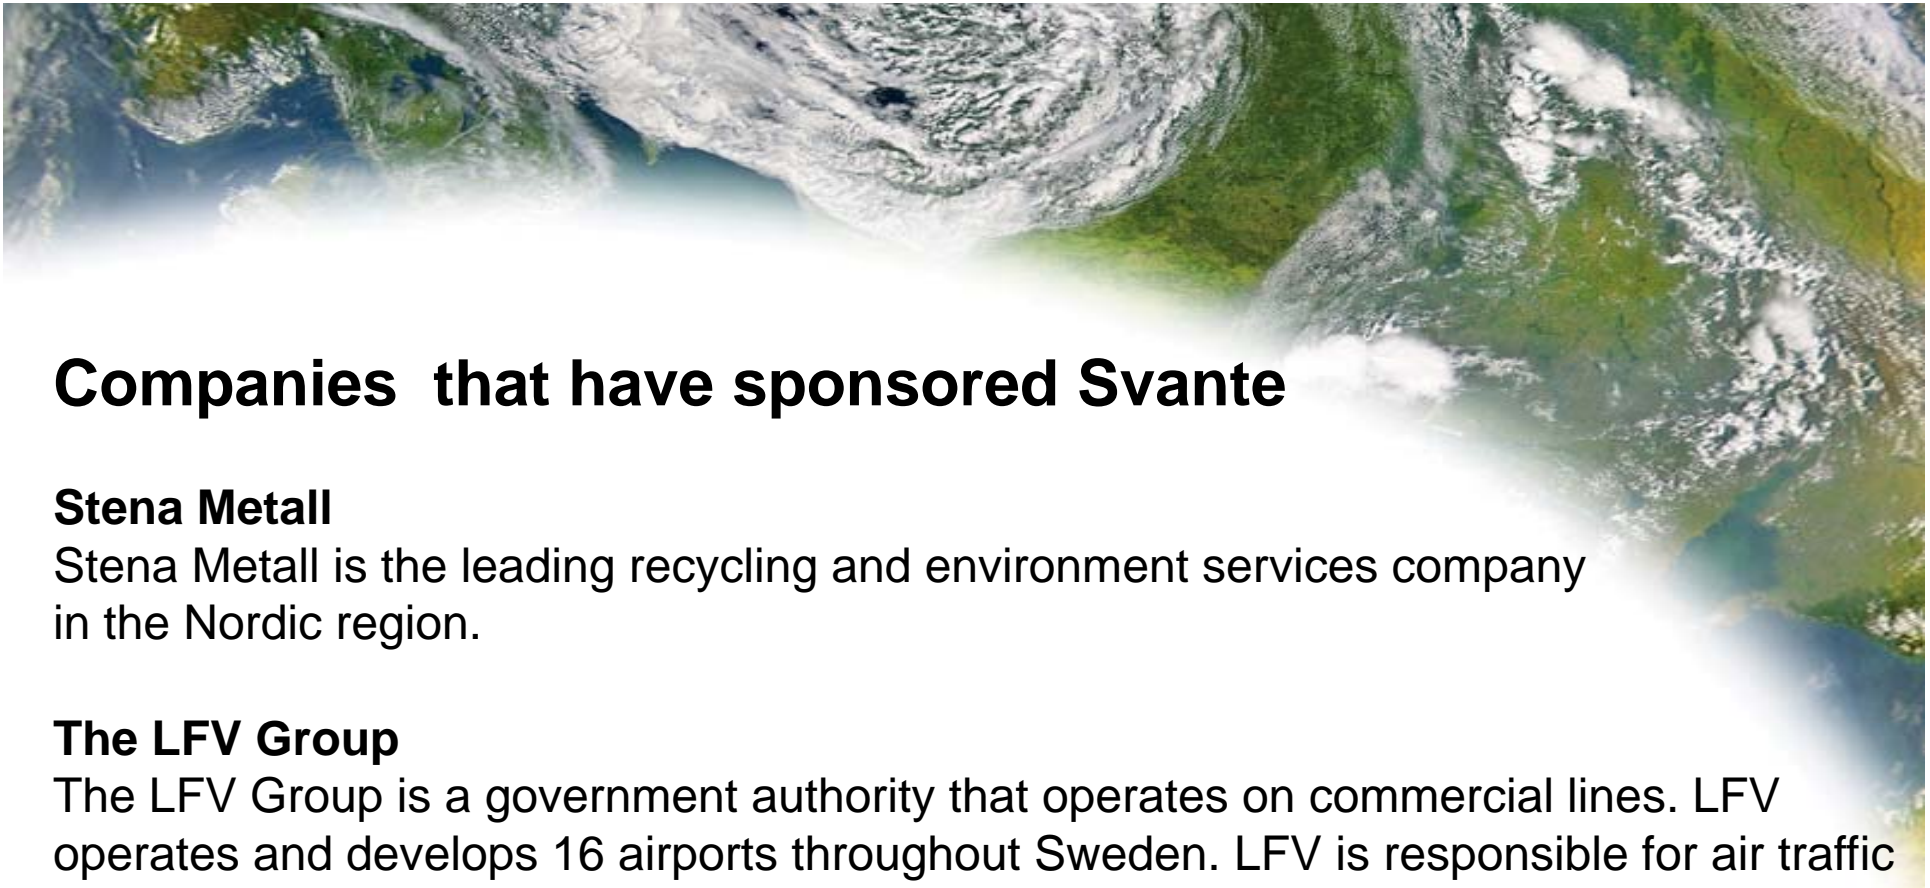

Cooperation with the World Resources Institute

Building on its experience from the work with the GHGP, Respect has developed a web based, user-friendly climate program to measure climate impact according to GHGP standards.

Respect has been an active partner in the development of the GHG-protocol (GHGP) standard since 2000 through its Business Leaders Initiative on Climate Change (BLICC). BLICC has been instrumental in piloting and sharing important case studies with the GHGP co-convenor World Resources Institute (WRI) on the implementation of the GHGP corporate standard. Together Respect and WRI pioneered the introduction of the GHGP in China based on the BLICC experience through a joint workshop in 2006.

Companies that have sponsored Svante

Stena Metall

Stena Metall is the leading recycling and environment services company in the Nordic region.

The LFV Group

The LFV Group is a government authority that operates on commercial lines. LFV operates and develops 16 airports throughout Sweden. LFV is responsible for air traffic services for both civil and military aviation.

Vasakronan

Vasakronan is one of the leading property companies in Sweden. Its main orientation is office premises and shops plus a wide range of services.

The European Union and Svante

Respect is through Svante a Campaign Partner to the Sustainable Energy Europe Campaign.

The campaign, initiated by the European Commission, aims to raise awareness and change the landscape of energy consumption.

Svante is nominated to the 2008 Nordic Council Nature and Environment price

The price will go to a product, invention or a service which has contributed to reduce the energy consumption.

Reason for the nomination:

"The Climate Change Program Svante has inspired and facilitated companies to establish a systematic and successful climate work".

Nominator: Elanders

Elanders is a global infomedia and printing Group with local presence in eleven countries, on four continents.

Respect is behind the Svante Climate Change Program initiative

Respect has worked with climate conscious companies since 2000 including within BLICC (Business Leaders Initiative on Climate Change). Our work aims to find ways of reducing companies' environment impact in a profitable and systematic way.

Svante is a product of years of experience to combat climate change. We hope that the userfriendliness of Svante will inspire and enable companies to reduce their climate impact.

Respect works in several international competence networks

BLICC Business Leaders Initiative on Climate Change

Fortum, JM, LFV, Länsförsäkringar, SMHI, Statoil, Stena, Vasakronan

BLIHR Business Leaders Initiative on Human Rights

ABB, Ericsson, Barclays, GAP, HP, National Grid ALAN, Areva, The Body Shop, The Coca Cola Company

Respect Table Sustainability issues

SKF, Reed Elsevier, NovoNordisk, Triodos bank, Fortum, Osram, Whirlpool

Road to Copenhagen; Respect Table, Club of Madrid, Globe Europe
